WHO WE ARE

CLOVER LEAF SOLUTIONS is a leader in providing high-level consulting and technology services in the areas of Facilities Infrastructure, Safety, Health & Environment, and Information Technology. Headquartered in Albuquerque, New Mexico, with offices across the U.S., our highly trained specialists serve a mix of high-end commercial and government clients. We are a small business providing innovative solutions to meet our clients' needs and regulatory requirements, while protecting people and the environment.

OUR SERVICES

FACILITIES INFRASTRUCTURE

When it comes to managing your assets, we cover a wide scope of capabilities. From project management of multi-million dollar construction projects to inspection efforts, our staff brings experience to get the job done right. Our specialties include:

- **Construction Management & Inspection:** Our construction managers and ICC-certified mechanical, civil, and electrical inspectors work with the crafts, project owners, and other stakeholders to ensure safe project delivery on time, on budget, and in scope.
- **Project Management and Controls:** Our staff excels at managing a wide range of client projects, from concept through planning and execution to controls and completion. Our experience ranges from managing small, short-term projects to developing complex schedules using Primavera and cost controls for multi-million dollar, multi-year contracts.
- **NEBB-certified Air/Hydronic System TAB:** Our staff has more than 80 years of combined experience in testing, adjusting and balancing (TAB) of ventilating, air moving, air conditioning and hydronic systems and we hold certifications for TAB of Environmental Systems, Cleanroom Testing Procedures, TAB Theory, air and Hydronic Environmental Systems.
- **Asset Management:** For our government clients, the BUILDER™ system allows us to develop a proactive approach to asset management and resource allocation. We focus on facility inventory and condition assessment to prioritize facility maintenance and repairs and decrease costs.
- **Construction & Demolition:** Clover Leaf is a licensed General Contractor, employing highly qualified construction and project managers, schedulers, and health & safety professionals to execute new construction, renovations, roofing, demotion, and design/build projects in highly secure environments.

SAFETY, HEALTH & ENVIRONMENT

Our staff includes a deep bench of Certified Industrial Hygienists (CIH) and Certified Safety Professionals (CSP), as well as numerous mid-level specialists and technicians. We specialize in the following:

- **Nuclear & Industrial Safety Basis:** Clover Leaf personnel perform DOE-focused Safety Basis (also called ES&H Planning) in all program areas including Work Planning & Control; Authorization Basis; Performance Assurance; Nuclear Readiness Reviews; and USQ.
- **Asbestos & Lead Management Services:** We have a highly experienced team of project managers and technologists to manage asbestos and lead-containing materials in-place, to protect individuals and manage risk for the owners. We also perform waste management for these materials.
- **Construction Health & Safety:** We can help you ensure the health and safety of job sites, whether you're a construction contractor or owner. We work as teammates with the crafts to build strong safety performance.
- **Occupational Exposure Assessments (OEAs):** Clover Leaf performed over 2,000 OEAs for government and commercial clients to evaluate operations, determine monitoring and control methods, and properly document for compliance.
- **Environmental Compliance:** We can help you tame environmental compliance across multiple areas including hazardous waste and materials management and environmental assessments.

INFORMATION TECHNOLOGY

Clover Leaf has designed tailored programs for large government clients and commercial customers of all sizes. We're well-versed in waterfall and Agile approaches as well as the scrum method of project management. We specialize in the following:

- **Software development** using a variety of languages including C#, Ruby on Rails, Python, and others
- **Database development and management**
- **Configuration and customization** of commercial off-the-shelf software (COTS), including RSA Archer and Tableau
- **Cloud-based software**, including our own patented 2-click task management software (AutoPilot)
- **Independent Verification & Validation (IV&V)** to ensure projects are conducted on-budget, on-schedule, and meet the project scope and client's goals.

Our goal is to build trust and respect with our clients, and to provide service that reaches beyond their expectations.
